**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/24/2008 has been entered.

This Office action is in response to the Applicant's Amendment filed 10/24/2008.

Claims 1 and 4 are amended.

Claims 2-3 and 11-20 are canceled.

Claims 1 and 4-10 remain for examination.

***Response to Arguments***

2. Applicant's arguments, see Amendment's Remarks, filed 10/24/2008 with respect to Claims 1 and 4-10 have been fully considered and are persuasive.

***Allowable Subject Matter***

3. Claims 1 and 4-10 are allowed.

The following is an examiner's statement of reasons for allowance: Any prior art of the record does not teach or suggest alone or in combination with other prior art of record the specific features required in the independent Claim 1 such as "associating two or more access control lists with a given filesystem object in a heterogeneous filesystem, wherein the heterogeneous filesystem comprises a

native filesystem and one or more additional differing filesystems, and each of the access control lists are usable for controlling access to the given filesystem object by a particular type of filesystem within the heterogeneous filesystem; responsive to receiving, from a requestor, a request for an access control list associated with the given filesystem object, determining a filesystem type of the requestor; determining whether an access control list in the two or more access control lists associated with the given filesystem object matches the filesystem type of the requestor, wherein the two or more access control lists associated with the filesystem object comprises multiple, different access control list formats; and responsive to a determination that an access control list in the two or more access control lists associated with the given filesystem object matches the filesystem type of the requestor, returning an access control list from the two or more access control lists for the given filesystem object matching the filesystem type of the requestor, wherein the step of returning the matching access control list includes accessing the matching access control list using an access mechanism associated with the filesystem type of the requestor, wherein the access mechanism is selected from a plurality of access mechanisms that each facilitate access control for a given filesystem type within the heterogeneous filesystem by providing access to a given access control list that corresponds to a given one of the plurality of access mechanisms" recited in the independent Claim 1. The prior art taken either single or in combination fails to anticipate or fairly suggest the above limitations of applicant's independent claims in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. Therefore, the claimed invention is considered to be in condition for allowance as being novel and non-obvious over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
